OR

Building or district purchases can lock in up to 3 years at the \$2/student price with full payment by 7/31/13.

GradeCam

KNOW INSTANTLY

GradeCam is a powerful formative assessment tool that provides instant item analysis in the classroom, turning any camera connected to your computer into an assessment powerhouse, whether it's an iPhone, iPad, webcam, document camera or GradeCam's lightweight ClassCam.

REDUCE COSTS

GradeCam doesn't charge for forms, because we believe the cost of forms shouldn't limit your ability to assess. Frequent formative assessment requires an inexpensive solution.

SAVE TIME

GradeCam works with all electronic gradebooks to automate tedious data entry for tests, graded papers, and credit/no credit assignments. We know you have better things to do than data entry!

WORK TOGETHER

GradeCam makes it easy to aggregate and share assessment results in real time, providing quick data from district benchmark assessments or classroom spot checks.

"I love

TEACHING

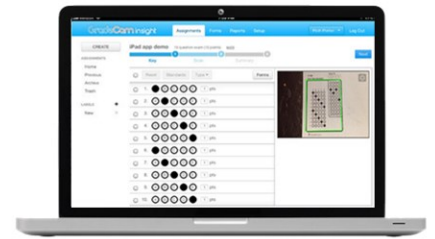

not grading."

www.gradecam.com

GradeCam

If it has a camera, you can grade with it.

- » Grade multiple-choice assignments with any web, iOS, or document camera.
- » Transfer scores into any electronic gradebook.
- » Give students immediate personal feedback.
- » Share assessments with other educators in real-time.
- » Link questions to state standards and generate standards-based reports.
- » Create and print answer forms on plain paper or go green with reusable forms.

"This product provides huge amounts of data to guide instruction, gives students immediate feedback and the opportunity to develop critical thinking skills, saves teachers huge amounts of time with scoring, data entry, the gathering and analyzing of data allowing teachers to focus on the creation and delivery of better instruction."

- Melissa Bohmer, Cincinnati Public Schools -
Information and Technology Management Training Coordinator
